DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a protein, classified in class 530, subclass 350.
- II. Claims 2-6 drawn to DNA and host cell, classified in class 435, subclass 69.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the protein of Group I could be made by entirely different process, such as isolation from nature, rather than using the DNA of Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. The claims of Groups I and II are drawn to a multitude of nucleic acids (SEQ ID NO: 4-6, 7, 9 and 11) and proteins (SEQ ID NO: 1-3). This constitutes recitation of an implied, miss-joined Markush group that contains multiple, independent and distinct inventions. Each of the different nucleic acids/polypeptides are independent and distinct

Art Unit: 1647

because no common structural or functional properties are shared. Accordingly, these claims are subject to restriction under 35 U.S.C § 121.

Upon election of one of Groups I and II, applicant is additionally required to elect a single nucleic acid or protein. This requirement is not be construed as a requirement for an election of species, since each of the compounds recited in alternative form is not a member of a single genus of invention, but constitutes an independent and patentably distinct invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
